

Application No. 09/635,011  
Response to Office Action

Customer No. 01933

R E M A R K S

Claim 11 has been amended to clarify the features of the present invention whereby the reading means reads from the storing means of the service center the regional information corresponding to the position information attached to the electronic mail, and attaches the regional information to the electronic mail, as supported by the disclosure in the specification at page 15, lines 13-20.

In addition, claim 11 has also been amended to delete the recitation added in the Supplemental Amendment filed by facsimile on August 27, 2004 whereby the means for transmitting the electronic mail transmits the electronic mail with the regional information attached thereto, when an information attachment mode is set. Since the information attachment mode is set in the communication terminal, this recitation has been deleted to avoid any possible misinterpretation that the information attachment mode be set in the service center.

It is again respectfully submitted that the present invention as recited in amended independent claim 11 and claims 13-15 depending therefrom patentably distinguishes over the combination of Garfinkle and Tullis under 35 USC 103.
